

# ENERGY CONCENTRATION INSTRUCTIONS

Energy Concentration is a fun card game that tests your memory while helping you learn more about our energy system. Play with two or more players or challenge yourself in a game of solitaire!

## STEP 1: MAKE THE GAME

### YOU WILL NEED:

PRINTER

PAPER

SCISSORS

GLUE

24 INDEX CARDS

### FOLLOW THESE STEPS:

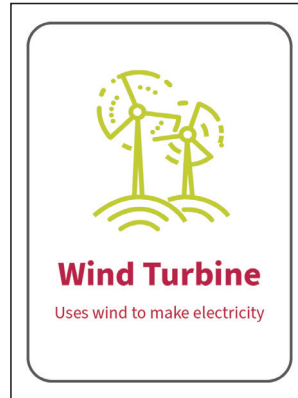

1. Print (single-sided) out all the “Card Faces” and “Card Backs.”
2. Cut all the cards out. There should be 24 faces and 24 backs total.
3. Glue your Energy Concentration card faces on one side of your index cards, then glue your backs on the other. (If you’re not using index cards, just glue the front and back together.)
4. Let your glue dry and then play the game!

# ENERGY CONCENTRATION INSTRUCTIONS

## CARD FACES

## CARD BACKS

## STEP 2: PLAY THE GAME

The rules to Energy Concentration are easy to learn

### FOLLOW THESE STEPS:

-  Shuffle the cards and lay them face down in a grid.
-  The first player selects two cards and turns them face up.
-  If the cards match, the player wins the pair, removes it from the grid, and plays again.
-  If the cards don't match, turn them over again, and the next player takes a turn.
-  Play continues until all pairs have been found.
-  The person with the most pairs is the winner!
